Introduction

GRI's Sustainability Disclosure Database stores and tracks critical reporting and associated organizational data. Advanced search functionality allows filtering and sorting of reports and organizations by multiple criteria, revealing trends and patterns in reporting practice.

In some instances, the results of the search will show the reports in blue (i.e. ) and/or grey (i.e. ). This differentiation in color appears if a report has a report cover on the page (as you will see in the section *Report Profile* on page 9 of this document) or not. If the report has the cover and hence the '.pdf' link, then it will be shown as blue, otherwise, it will be shown as grey.

Information about on-trend subjects is as well featured – such as which organizations declare that they are already preparing integrated reports that combine financial and sustainability disclosures. The Sustainability Disclosure Database is populated in GRI Data Partners around the world.

This document explains the different data fields that are captured in the Database.

Organization Profile

Every organization that has published a sustainability/Integrated report that is included in the Sustainability Disclosure Database has an Organization Profile page. A completed Organization Profile page facilitates interaction between a reporting organization and its multitude of stakeholders by detailing the organization's high-level defining characteristics, its sustainability risks and opportunities, most recent news, and reporting history. Social Media connectivity also provides channels for open communication.

Report Profile

All sustainability/Integrated reports that are publicly available and registered with GRI have a Report Profile page. A complete Report Profile provides high-level information related to the report, as well as link(s) for accessing it.

The screenshot shows the GRI Sustainability Disclosure Database interface. At the top, there is a navigation bar with the GRI logo, 'SUSTAINABILITY DISCLOSURE DATABASE', and links for 'ABOUT', 'SEARCH', 'REGISTER REPORT', 'DATA PARTNERS', and 'SDG TARGET 12.6'. Below this is a teal banner with the text 'Home Reports / GRI Empowering Sustainable Decisions. Annual Report 2015-2016'. The main content area features a report cover image on the left and a detailed profile on the right. The profile includes the report title, GRI logo, and a list of metadata fields such as 'Publication year: 2016', 'Report type: GRI - G4', 'Adherence Level: In accordance - Core', and 'Sector supplement: Food Processing'. A right-hand column lists various standards and guidelines with 'X' marks, indicating compliance or relevance.

Report Profile Data

Upon registering a sustainability report, an organizational representative (First or Second contact) or GRI Data Partner includes the following data.

- a. Date Included
Indicates the date that the report was added to the Database
- b. Report Title
- c. Publication Year
Indicates the calendar year in which the report was published; this is not the year or period the report covers

d. Report Type

GRI reports are sustainability/Integrated reports based on the GRI Standards or previously existing Sustainability Reporting Frameworks for which there is a GRI Content Index available.

The field 'Report Type' indicates the version of the GRI Guidelines applied in the report

1. **GRI – G1** (published in 2000)
2. **GRI – G2** (published in 2002)
3. **GRI – G3** (published in 2006)
4. **GRI – G3.1** (published in 2011)
5. **GRI – G4** (published in 2013): valid until 30 June 2018
6. **GRI – Standards** (published in 2016): currently valid

Citing-GRI**

Indicates sustainability/Integrated reports that make explicit reference to being based on the GRI Guidelines (G3, G3.1 or G4) but for which there is no GRI Content Index.¹ Also, indicates those reports published after 1 July 2018 that refer to the G4 Guidelines.

Non-GRI****

All sustainability/integrated reports that do not satisfy the database requirements of the GRI-Standards report type.

At the same time, Non-GRI indicates sustainability/Integrated reports in which the organization discloses information on its economic, environmental, social and/or² governance performance, but there is no reference to being based on the GRI Guidelines or GRI Standards.

e. Integrated Report*

Indicates whether or not the report includes both non-financial and financial disclosures, beyond basic economic information.

Organizations self-declare whether or not their report is integrated.

f. Adherence Level

Reflects the extent to which the GRI Sustainability Reporting Framework and GRI Standards have been applied to a report.

For **GRI – Standards** reports:

- **'in accordance' – Core:** it must include in the report the statement "This report has been prepared in accordance with the GRI Standards: Core option"
- **'in accordance' – Comprehensive:** it must include in the report the statement "This report has been prepared in accordance with the GRI Standards: Comprehensive option"
- **GRI-Referenced:** when a report has the following statement "This material references [full name and publication year of the Standard]", for each Standard used, plus it may or may not have a Content Index. These are reports that use individual GRI Standards or parts of their content to report sustainability information, and therefore cannot claim that the report has been prepared in accordance with the GRI Standards.

For **GRI – G4** reports:

- **'In accordance' - Core**
- **'In accordance' – Comprehensive**
- **Undeclared:** When there is no explicit 'in accordance' option declared, but the report contains a complete G4 Content Index

¹ Before 2017 this category was known as "GRI-Referenced"

² This definition was updated with "and/or" as of 1st of January 2018

For **GRI – G3** and **GRI – G3.I** reports:

- **A, B, C**
- **A+, B+, C+** (a '+' can be added to an Application Level to indicate that the report is externally assured, the organization finds the engagement meets GRI's 7 key qualities for external assurance, and that there is a publicly available *external assurance statement*)
- **Undeclared:** When there is no explicit Application Level declared

For **GRI – G2** reports:

- **In Accordance:** Indicates that the report is declared to be in accordance with the G2 Guidelines
- **Content Index only:** Indicates that there is a GRI Content Index available, but the report is not declared to be in accordance with the G2 Guidelines

g. **GRI Service**

Indicates whether the Report has gone through one of the GRI Services:

- Materiality Disclosures Service
- Content Index Service
- SDG Mapping Service
- GRI-Referenced Service
- Application Level Service

h. **Status**

Relates to the status of the Application Level declaration for the GRI report, applies specifically to **GRI – G3** and **GRI – G3.I** Reports.

Self-declared

- Indicates the Application Level declaration was not confirmed by GRI or another third-party
- All Application Level declarations begin with a self-declaration from the organization

GRI-checked

- Indicates the report went through a GRI Application Level Check (before December 2014)
- As of December 2014, GRI does not provide an Application Level Check, and thus reports submitted for a service after that date are not referred to as "GRI-Checked"

Third-party-checked

- Indicates the Application Level was confirmed by a third-party
- This confirmation is separate from external assurance

i. **Sector disclosures/ Sector supplement**

Indicates whether one of the *final versions* of the GRI Sector Supplements was used in the report.

- Electric Utilities (EUSS)
- Financial Services (FSSS)
- Food Processing (FPSS)
- Mining & Metals (MMSS)
- NGO (NGOSS)
- Not Used
- Airport Operators (AOSS)
- Construction & Real Estate (CRESS)
- Event Organizers (EOSS)
- Oil & Gas (OGSS)
- Media (MSS)

Indicates that there is an applicable final version Sector Supplement or Sector Disclosure available for the organization's sector, but that it was not used in the report

- Not Applicable

Indicates that there is no final version Sector Supplement or Sector Disclosure available for the organization's sector

- j. Reporting Period
Indicates the year(s) or period that the report covers. This is different from the Publication Year
