

Circularity and Waste Management Reporting

Explore how your organization can reduce waste, embrace circularity, and report with confidence.

Why this eLearning course matters

As waste and pollution push the planet beyond its ecological limits, organizations are expected to adopt more circular approaches. This course equips you with the knowledge and reporting tools to understand and manage waste, pollution, and circularity.

What you will learn

- Explain different types of waste and how waste and pollution affect biodiversity, ecosystems, and human health.
- Describe the principles of the circular economy and how circular design helps prevent waste and pollution at the source.
- Explain the business case for circularity, including opportunities for innovation, resource efficiency, and value recovery.
- Describe the waste management hierarchy and key approaches for reducing, reusing, repairing, recovering, and recycling materials.
- Explain how organizations assess, manage, and report waste-related impacts.

COURSE DETAILS

- **Duration:** 1.5 hour
- **Format:** Self-paced online learning
- **Language:** English
- **Prerequisites:** None
- **Certificate:** GRI Academy Certificate of Completion
- **Price:** €99

WHO IS THIS COURSE FOR?

- Sustainability professionals and reporting practitioners
- Investors and civil society representatives
- Policy makers and regulators focused on how organizations can reduce waste, adopt circular practices, and report on their performance.

ABOUT GRI

*The Global Reporting Initiative (GRI) is the **architect of the world's most widely used sustainability reporting standards**. Since 1997, GRI has provided organizations with a global common language for sustainability impacts, enabling them to create sustainable, long-term value.*

WHY CHOOSE THE GRI ACADEMY

- | **13,000+** learners trained in **150+** countries
