

STRENGTHENING SUPPLY CHAIN REPORTING BUSINESS LEADERSHIP FORUM

Is your business driving sustainability and transparency in your supply chain? Do you find it challenging to connect supply chain responsibility and corporate sustainability reporting? Do you want to get a better understanding on how you can make your supply chain more transparent using the GRI Standards?

Explore these and other questions and share your insights with a group of like-minded peers in the GRI's Business Leadership Forum on Strengthening Supply Chain Reporting. Under the guidance of GRI, businesses at the forefront of supply chain reporting will delve into the latest in sustainability reporting for supply chain, and how tools, technologies and the GRI Standards can support their efforts.

The two-year program combines virtual and in-person, plenary and small group meetings. Since businesses and GRI will co-design the agenda, participants will be able to address the most pressing questions and discuss the most meaningful issues in a trusted setting.

At the end of the program, your business will be in a better position to:

- + Establish a clear link between supply chain management and sustainability reporting
- + Better understand and communicate your supply chain impacts
- + Report effectively about your supply chain performance

GRI invites businesses to discuss relevant topics related to sustainability reporting on the supply chain. Expressions of interest are welcome from companies that meet the following criteria:

- + Reporting companies with complex supply chains
- + At least 2 cycles of reporting experience
- + Preferably users of the GRI Standards

The annual fee to participate in this program is:

GRI community member: €13,000*
Non-community member: €14,500

*Membership credits can be used as part of the participation fee

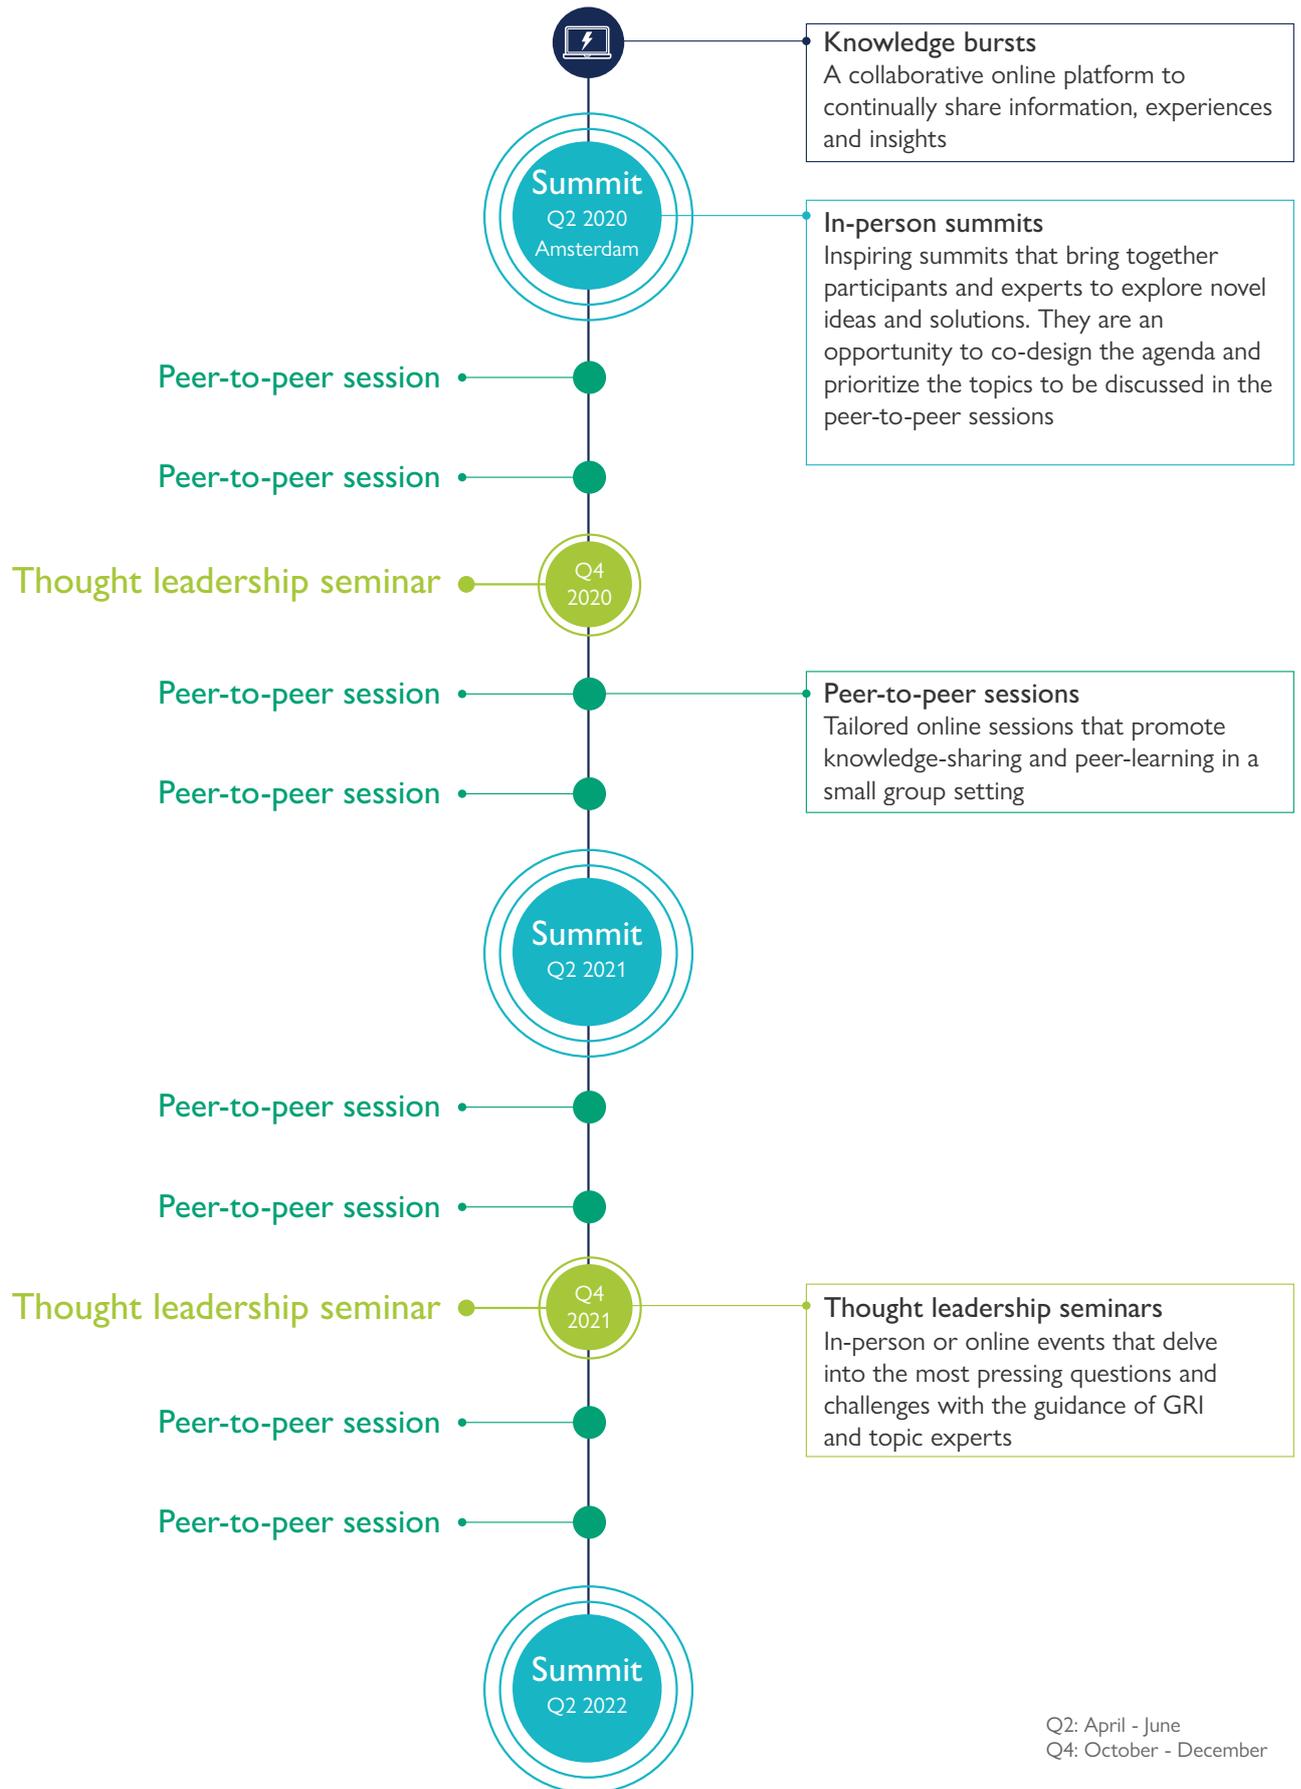

“Transparency based on good data is the foundation of good supply chain management. Companies manage what they measure, which is why monitoring the key impacts is essential for efficient and sustainable supply chains.

Tim Mohin
Chief Executive of GRI
